

HTTP FoxBox G20/G25

USER MANUAL

(addenda to SMS/MMS FoxBox G20/G25 Manual)

Revision 4.0

For more informations please write to luka@kdev.it

Index of contents

1. Introduction

2. Web service configuration

1. Introduction

This device misses all the more advanced features, providing just basic SMS management and an integration channel with other applications via HTTP protocol. It can be used as starting point for personal developments.

For every topic about the FoxBox not covered in this manual, please refer to the SMS/MMS FoxBox G20/G25 manual on the website (www.smsfoxbox.it).

In order to connect to the FoxBox, you have a web interface at the address:

192.168.0.98

Here you will access using the credentials:

- 1. Username: admin*
- 2. Password: admin*

On the other hand, if you need to remotely access the device with SSH or TTY, the credentials are:

- 3. Username: root*
- 4. Password: foxboxg20 or foxbox*

Remember that supported browsers are:

- Mozilla Firefox
- Opera
- Netscape
- Internet Explorer 6

2. Web service configuration

From this page you can configure the web service to work with.

The only parameter needed is:

Address: this is the address (as IP or FQDN) of the web service.
